Technology professional with a background spanning data, systems, software engineering, and technical operations. Hands-on experience now informs a broader role focused on understanding problems, improving processes, coordinating work across teams, and translating technical complexity into practical solutions.

AREAS OF EXPERIENCE

Technology & Systems	Data & Decisions	Processes & Delivery	Communication
Software platforms, databases, APIs, business systems, architecture, and technical operations.	Analysis, reporting, data quality, operational visibility, and evidence-based problem solving.	Requirements, workflow design, prioritization, QA/UAT, documentation, and follow-through.	Cross-functional coordination, technical communication, mentoring, and knowledge sharing.

PROFESSIONAL EXPERIENCE

2026 - Present	Data Solution Manager Meditrial New York Coordinate technology, data, and process initiatives across clinical trial platforms. Translate operational needs into clear requirements, organize follow-through across development, QA, design, clinical operations, and leadership, and use analysis to identify gaps and improve workflows. Joined Meditrial as a Backend Software Developer in March 2026 before moving into the current broader role.
Jul 2024 - Oct 2025	Backend PHP Developer BLOX Digital Developed and optimized a large enterprise CMS serving more than 100 news organizations. Improved PHP and SQL performance, supported reliable releases, and collaborated across a distributed product and engineering environment.
May 2022 - Mar 2024	Backend PHP Developer Appliances Connection New York Built warehouse management workflows supporting inventory and order fulfillment. Connected business operations with backend services, handheld interfaces, and database structures designed for consistent daily use.

Dominic Minischetti

TECHNOLOGY | DATA | SYSTEMS

Aug 2021 - May
2022

Full Stack Developer

Kingsleague | Berlin

Developed product features using PHP, MySQL, and Firebase. Introduced browser automation with Python and Selenium and supported Docker-based development and deployment workflows.

Sep 2010 - Oct
2015

Data Analyst & Database Administrator

Call2U | Italy

Consolidated reporting systems, maintained SQL Server and MySQL environments, developed automation and Power BI dashboards, and administered server environments for more than 50 clients.

Dec 2006 - Apr
2008

Web & Systems Operations

ASD Servizi | Italy

Built and maintained websites and PHP applications while managing hosting, domains, mailboxes, content, Plesk administration, and SQL databases.

EDUCATION & ADDITIONAL INFORMATION

Bachelor of Technology, Computer Information Systems
Database Track, CUNY New York City College of Technology | 2018 - 2020

Earlier Study
Computer and Information Sciences coursework,
Universita degli Studi di Bari | 2000

Languages
English and Italian: Native or bilingual
Spanish: Elementary

Technical Foundation
PHP, SQL, MySQL, SQL Server, REST APIs, Docker,
Linux, Python, automation, reporting, and web systems.
